RAMESA

Forging & Engineering Works

Manufacturers of forged & machined flanges & components
also we provide service for Hardness Test, PMI Test, NDT Test
(UT, MPT, DPT, and Visual etc), Coating Thickness
Measurement, and Third Party Inspection Services.

GST No: 24CUFPR0365E1ZS

We are from Ramesa Forging and Engineering Works we have more than 20 years of experience in various forging industries, Alloy Steel Plants, Refineries and Petrochemical Industries for various materials specifications, construction of materials, application for various criticalness, services of materials as per ASME B31.3, end uses of various materials grades and various type of flanges & forging components.

We are engaged in manufacturing of [Forged, Heat Treated, Tested & Machined Flanges](#), [Round bars](#), [Step Shafts](#), [Forged Blocks](#), [Forged Square Bars](#), [Forged Circles](#), [Tube Sheets](#), [Manhole Cover Flanges](#), [Long WeldNecks](#), [Nozzle Flanges](#) etc. The production capacity of Stainless Steel flanges/ Carbon Steel are 50 MT/Month. Our Company is manufacturing Products in accordance with various Standard specifications like ANSI, ASME, European Standard, JIS and BS, Clients TDC/Specifications etc. We manufacture flanges as per IS, ASME B16.5, JIS G3214, DIN EN1092-1, BS 4504 etc.

We supply to the needs of various clients to provide them Quality material in the above categories.

We have in-house Manufacturing facilities for Cutting, Forging, Heat Treatment, Testing and Machining.

We have in-house testing facilities for PMI (Positive Materials Identification) Test, Ultrasonic Test, Hardness Test, Liquid Penetrant Test, Magnetic Particle Test, Ultrasonic Thickness Measurement, Job Forging Temperature Measurement by Infrared Pyrometer, Coating Thickness Measurement etc.

Also we provides services for PMI Test, Ultrasonic Testing, Magnetic Particle Testing, Ultrasonic Thickness Measurement, Hardness Testing, Third Party Inspection Services for Various Engineering items i.e. Flanges, Pipes, Fittings, Gaskets, Valves, Piping Spools, Fasteners, Structure Materials for plates, C Channels, H Column, I Beam , Angles, TMT Bars, etc.
